# 2022 Q1 investor call

17 March 2022

# IMPORTANT NOTICE AND DISCLAIMER

This presentation contains information about PYC Therapeutics Limited and its related bodies corporate (PYC) as at the date of this presentation.

This presentation is for information purposes only and is not a prospectus or product disclosure statement, financial product or investment advice or a recommendation to acquire PYC shares or other securities.

Information is provided in summary form only and does not purport to be complete. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. To the maximum extent permitted by law, none of PYC or its directors, employees or agents, nor any other person, accepts liability for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it, including, without limitation, any liability from fault or negligence on the part of PYC or its directors, employees, contractors or agents.

This presentation contains forward-looking statements in relation to PYC, including statements regarding PYC's intent, belief, goals, objectives, initiatives, commitments or current expectations with respect to PYC's business and operations, market conditions, results of operations and financial conditions, products in research and risk management practices. Forward-looking statements can generally be identified by the use of words such as "forecast", "estimate", "plan", "will", "anticipate", "may", "believe", "should", "expect", "project," "intend", "outlook", "target", "assume" and "guidance" and other similar expressions.

The forward-looking statements are based on PYC's good faith assumptions as to the financial, market, risk, regulatory and other relevant environments that will exist and affect PYC's business and operations in the future. PYC does not give any assurance that the assumptions will prove to be correct. The forward-looking statements involve known and unknown risks, uncertainties and assumptions and other important factors, many of which are beyond the control of PYC, that could cause the actual results, performances or achievements of PYC to be materially different to future results, performances or achievements expressed or implied by the statements. Factors that could cause actual results to differ materially include: the success of research and development activities, decisions by regulatory authorities regarding approval of our products as well as their decisions regarding label claims; competitive developments affecting our products; the ability to successfully market new and existing products; difficulties or delays in manufacturing; trade buying patterns and fluctuations in interest and currency exchange rates; legislation or regulations that affect product production, distribution, pricing, reimbursement, access or tax; acquisitions or divestitures; research collaborations; litigation or government investigations, and PYC's ability to protect its patents and other intellectual property.

Except as required by applicable laws or regulations (including the ASX Listing Rules), PYC does not undertake any obligation to publicly update or revise any of the forward-looking statements or to advise of any change in assumptions on which any such statement is based.

Therapeutics

**Q1 synthesis**

Strong progress within PYC, strong industry headwinds outside

# PYC is progressing to a clinical-stage company in 2022

## **PYC's immediate ambition is to become a platform Company with a clinically-validated technology**

- The three core milestones identified for 2022 to define the Company's progression to a clinical-stage biotech were:
  1. Establishing a tolerated dose of the Retinitis Pigmentosa type 11 (RP11) investigational candidate in Non-Human Primates
  2. Engaging the US Food and Drug Administration (FDA) through a pre-IND process to define the path to First In Human (FIH) studies in RP11
  3. Submitting an Investigational New Drug (IND) application to the FDA enabling progression into FIH studies in RP11
- PYC remains on track to achieve all three milestones by Q4 this year

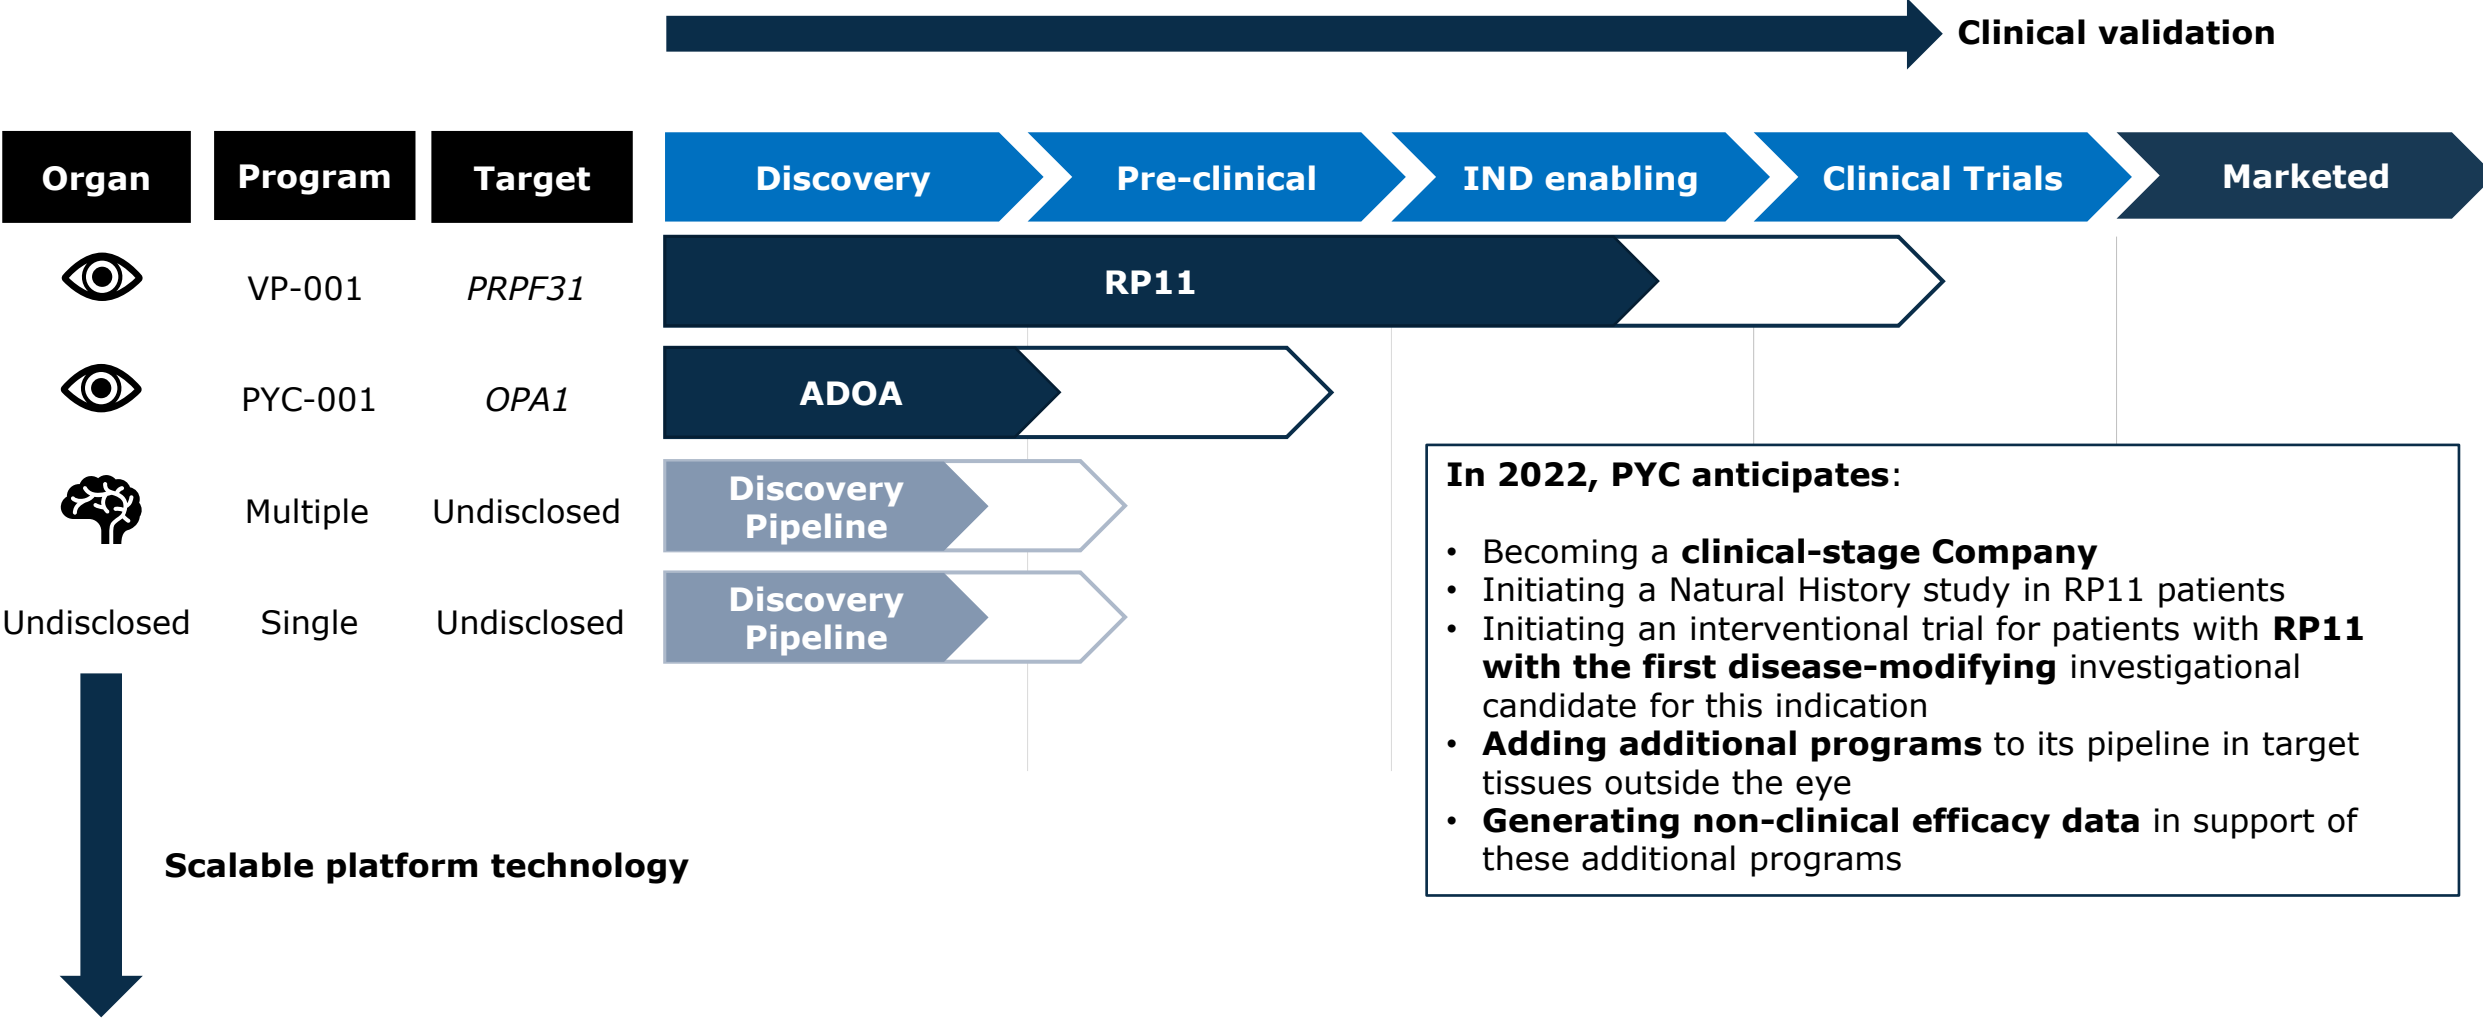

# PYC's pipeline is expanding into high-value indications

PYC is expanding its pipeline of programs into additional high value targets both in the eye and beyond

- The Company's focus is on monogenic diseases due to:
  - The substantially higher probability of success in clinical development associated with these programs
  - The faster path to market associated with potential treatments for unmet needs in rare disease
- The combination of these features means that value is built early in non-clinical development in these programs with the initial evidence of target engagement and impact on gene expression

# Platform technologies with clinical validation are amongst the most sought-after assets in the life sciences industry

**In 2022, PYC anticipates:**

- Becoming a **clinical-stage Company**
- Initiating a Natural History study in RP11 patients
- Initiating an interventional trial for patients with **RP11 with the first disease-modifying** investigational candidate for this indication
- **Adding additional programs** to its pipeline in target tissues outside the eye
- **Generating non-clinical efficacy data** in support of these additional programs

PYC 93.5% ownership of VP-001 (6.5% ownership by Lions Eye Institute, Australia) and 100% ownership of all other pipeline programs
